

## TDS – EcoSoya CB-Advanced

### Information

---

#### Product Description

EcoSoya CB-Advanced is formulated for use in the manufacture of container candles.

#### Physical Properties

Test	Method	Typical Value
Congealing Point, °C	ASTM D938	38
Viscosity @ 100°C, cSt	ASTM D445	8.5
Penetration @ 25°C, dmm	BS 1426	40
Colour	Visual	Off White

#### Statement

- Formulated from materials whose refining history is fully traceable.
- Due to the prevalence of genetically modified soybean crop in the market we are unable to guarantee entirely non-GMO sources, but we aim to source non-GMO wherever possible.
- Does not contain residual solvents as per guidelines CPMP/ICH283/95.
- Has not been tested on animals by ourselves or on our behalf.

#### Test Burn:

Check wicking. Test burn the candle for burn pool diameter and “mushrooming” after it has cooled for 48 hours. Mushrooming is when carbon and/or other substances build up on the end of the wick interfering with combustion. Mushrooming can cause sooting and poor odours. Try different wicks until you have your desired burn pool diameter and a good clean flame. Small air bubbles may be noticed around the wick during burning, this is a normal occurrence.

**Every combination of size, wax, dye, fragrance, and wick must be tested for burn quality**
